IIID1. Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability.

Evidence of Meeting the Standard

The NOCCCD’s financial resources are managed at the District Office, Cypress College, Fullerton College and School of Continuing Education (SCE) by professional staff who adhere to Board Policies and Administrative Procedures and follow generally accepted accounting practices. NOCCCD Board Policies and Administrative Procedures 6100-Delegation of Authority, Business, and Fiscal Affairs (IIID1.1), BP 6200- Budget Preparation (IIID1.2), BP/AP 6250-Budget Management (IIID1.3a; IIID3.3b) and BP/AP 6300- Fiscal Management (IIID1.4a; IIID1.4b) serve as the primary policies that guide and regulate overall financial resources and allocation. Other policies and procedures including NOCCCD Board Policy and Administrative Procedures 6400-Financial Audits (IIID1.5a; IIID1.5b) BP 6500- Property Management (IIID1.6), and BP/AP 6740- Citizen’s Oversight Committee (IIID1.7a; IIID1.7b) among others, regulate specific aspects of District and College financial processes.

In order to determine the sufficient resources necessary to sustain student learning programs and services, each year the District Office, Cypress College, Fullerton College, and the SCE conduct Program/Quality reviews (IIID1.8a-F and F Admin. Review; IIID1.8b- ACR Program Review) to prioritize spending, hold consultative meetings to review and approve budget assumptions (IIID1.9 – DCC Summary, August 2016), develop detailed budgets through the Banner position control module and non-position budgets (IIID1.10- Banner Report), allocate funds in accordance with the Budget Allocation Handbook (BAH) (IIID1.11), and finally produce a detailed Proposed Budget and Financial Report for Board approval (IIID1.12-Proposed Budget 2015/16). Once established, the budget is monitored and discussed at Budget Officers meetings (IIID1.13 – Budget Officer Agenda), reported quarterly to the Board of Trustees (IIID1.14 – BOT Minutes November 2016), submitted to the State Chancellor’s Office (IIID1.15a- State Budget Report; IIID1.15b- Quarterly Report ) and audited at year-end by an outside accounting firm (IIID1.16- Audit Report 2016).

The budget provides sufficient resources for courses, programs and services including distance education courses with the exception of the Extended Day budget which has not met the Colleges’ needs and is supplemented with local monies. The NOCCCD has traditionally managed resources efficiently such that the District has maintained a healthy carryover fund each year as illustrated in the matrix below.

Unrestricted General Fund- Fund Balances
Financial resources are allocated to the two colleges and SCE in accordance with the BAH which is regularly reviewed and updated (IIID1.11-BAH). Cypress College uses Program/Quality Review for departments to assess their needs and request funding for new projects. The District conducts an annual Administrative Review to ascertain whether new funding is needed to fulfill needs. A detailed Proposed Budget/Financial Report is published by the District each year that specifies not only the allocation of financial resources for spending, but also the designation of other funds to be used in future fiscal periods (IIID1.12-Proposed Budget 15/16). Additionally, the District held about $152.9 million in other funds for retiree health benefits, self-insurance and capital projects (IIID1.17a–Summary Retiree; IIID1.17b–NOCCCD Balance Sheet).

Another indication of the District’s commitment to future financial stability is the designation of all of the recent Base Augmentation funding for STRS and PERS rate increases over the next several years (IIID1.18–BOT Base Augmentation). By designating the entire augmentation, the District should have sufficient resources to cover the anticipated increases through FY2025. In fiscal year 2016, the District set up a GASB-compliant OPEB irrevocable trust to fund retiree health benefits and established a Retirement Board of Authority to oversee the investments in the trust (IIID1.19–OPEB Trust). An MOU was recently negotiated with the labor groups to move the $70 million in retiree health benefits into the irrevocable trust (IIID1.20-MOU).

Educational improvement and innovation are District priorities and therefore allocates sufficient resources for these. Specifically, the District encourages innovation and strategic planning through separate funds and project selection processes (IIID1.21–District Planning Webpage). Beyond these specific programs, educational improvements and innovation are undertaken as part of the overall program review process and budget allocation process. In addition, the District allocates $200,000 towards staff support development as a means of encouraging staff to seek ways to improve efficiency (IIID1.12-Proposed Budget 15/16, p. 53).

In 2002 and again in 2014, District voters approved significant bond measures for the improvement and expansion of educational facilities. Additional controls have been
implemented to monitor expenditures related to these bond funded programs (IIID1.22a-Measure X Oversight; IIID1.22b-Measure J Oversight).

Once resources are allocated to the colleges/SCE, the institutions are responsible for the management of local funds. Cypress College is committed to the principle that financial planning and budget development is part of the institutional planning process. The financial planning and budget development process adheres to the vision, mission, core values, priorities, and goals of the College. The College adheres to state and federal mandated reporting and accounting procedures keeping with ensuring the financial stability and integrity of the College (IIID1.4a-BP 6300).

All campus categorical budgets are directly linked to the Directions outlined in the Strategic Plan (IIID1.23-Budget examples). The Planning and Budget Committee (PBC), which is a college-wide shared-governance committee, serves as the primary recommending body to the President’s Advisory Cabinet (PAC) on general planning and budget issues for the campus and conveys to PAC the positions of the campus constituencies on significant matters relevant to both planning and budget for the College (IIID1.24-PBC Guidelines). Financial decisions are discussed publicly in the above shared governance committees. Also, available resources for decision-making are reviewed each year at the Fall Opening Day College Update (IIID1.25-Opening Day Agenda).

The College manages the resources allocated in four fundamental ways, personnel, operational needs, critical needs or special opportunities. Every three years a process for prioritizing the college-wide need for classified staff is conducted. This prioritization serves as a guide for hiring as ongoing funds become available. The process is overseen by PBC and then a recommended priority list is forwarded to PAC. Expenditures for full-time faculty have an established process as well. An annual faculty position prioritization takes place with Deans and Academic Senate representatives creating a list that is recommended to PBC and PAC. Adjunct faculty needs are determined at the department level and partially fulfilled through the District Extended-Day Funding Model. Over the past three years, the College’s Extended Day budget has run at a deficit in excess of $1.5 million and growing each year. The College has been responsible for ensuring that the necessary courses are offered by utilizing local funding to produce FTES (IIID1.12-Proposed Budget 15/16, p. 55-56). Management positions are filled on an ad hoc basis, usually in response to changes occurring at the College (IIID1.26-Simpson email).

There are several opportunities for requesting funds which are set aside to meet critical needs of College programs and services. The most comprehensive budget allocation process involves an annual campus wide One-Time Funding Request process (IIID1.27). Criteria established to rank the requests include:
• Supports College mission, Educational Master Plan, Student Services Master Plan and Strategic Plan
• Growth of program and/or work area
• Quality of program and/or work area
• Demonstrated need within the Budget Unit
• Support of health/safety/security issues

Each spring the multiple requests for funding are prioritized and funding is attached after consideration of all possible sources (categorical, grants, carryover funds). After several years of reduced State Budgets, when only the most critical items could be funded, the College was only able to fund high risk safety concerns or items with an immediate impact to instruction. For 2014/2015 and 2015/2016, with the restoration of many sources of state categorical funding, almost all the requests submitted were ultimately attached to funding. Aside from this process there are a number of program requests, which are considered, by PBC, to be ongoing high priorities and are funded as “Advance Funding Programs” ahead of the priority process (IIID1.12- Proposed Budget Report 15/16, p. 55). These programs include Professional Development, Diversity Program, Computer Replacement Plan, and SLO Development (IIID1.28 – SLO Development Document.). The College also sets aside $750,000 each year, in contingency funds for unanticipated emergencies and opportunities. Examples of how these funds are used include emergency facility issues, or opportunities for student advancement in athletic or academic competitions. Any campus department may submit a request for funding to PBC for emergencies via an emergency request form (IIID1.29 – Emergency Funding Request).

Annual budgets include the funds necessary to support other expenses such as capital outlay, scheduled maintenance plans and unfunded retiree health liabilities (District) as well as required college matches for grants, and categorical programs (College). All budget allocations align with the College and NOCCCD Mission Statements.

Analysis and Evaluation

The College and District meet the Standard and Eligibility Requirement 18. Currently, NOCCCD and Cypress College financial resources are sufficient to support and sustain student learning programs and services, and improve institutional effectiveness. The College seeks to have student learning, services, and effectiveness by the highest priority in funding decisions. In accordance with established District policies and procedures as well as College processes and practices the allocation of resources is appropriately balanced between new development, maintenance, allocation, reallocation, and the goal of making the greatest impact on the student experience as prescribed in the Strategic Plans and Missions. Both NOCCCD and Cypress College have processes designed to plan and manage financial affairs with integrity and in a manner that ensures financial stability.
While currently meeting the Standard, the impact of the Extended Day Funding Model deficit will have significant future implications for the financial stability of the College. Relying on local funding to ensure that the necessary courses are offered has already impacted the College’s ability to continue to improve student success. The response to the deficit has impacted the College’s ability to provide the resources to support other necessary programs designed to promote student learning and achievement such as Distance Education, computer replacement, and the programs in the Learning Resource Center (IIID1.12 – Proposed Budget, p. 56; IIID1.30-Emergencies Spreadsheet). Long-term sustainability is not possible. The College is attempting to address this issue through QFE 3 – Extended Day Funding Model.

In addition, while relevant constituency groups are members of District decision-making bodies, allocation and reallocation decisions sometimes lack true collaboration and participatory decision-making. Instead, committee members are informed of decisions already made and are expected to adjust financial planning and decisions accordingly. For example, in 2016 the colleges were informed of a $100,000 decrease to their International Student budgets that resulted in a reduction of carryover funds and threatens the ability to grow the International Student program. The District and College would benefit from greater participation of all parties in the decision-making process and increased consideration of College input into the final decisions made.

IIID2. The Institution’s mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

Evidence of Meeting the Standard

Cypress College engages in financial planning and decision-making in accordance with the College mission and the goals set forth in the planning documents, the Educational Master Plan (EMP) and Strategic Plan (SP). These institutional planning documents establish priorities among competing needs in order to predict future funding. The EMP is a ten-year planning guide that identifies long term College projects with goals for specific departments and student service areas (IIID2.1 - EMP). The SP is the three-year roadmap that identifies plans designed to accomplish the goals laid out in the EMP (IIID2.2 - SP). The financial resources and planning necessary to achieve these goals are an integral part of the planning process. Departments use their Program (PR) and Quality Reviews (QR) to identify their own goals and objectives related to student success, organizational excellence and relations with the community (IIID2.3 – AC-R PR, p. 7) and the fiscal resources necessary to achieve them.

The EMP Diagram (IIID2.1 – EMP, p. 2) illustrates how five plans: Student Services Plan (IIID2.4), Student Success and Support Program (SSSP) Plan (IIID2.5), Student Equity Plan (IIID2.6), Technology Plan (IIID2.7) and Facilities Plan (IIID2.8 – Facilities Plan) work together to achieve the goals set forth in the EMP and SP. The annual Planning and Budget Process (IIID2.9 - BAH, p. 4), which funds Classified Needs, Faculty Needs, Facilities Projects and One-Time Budget Allocations are linked to the planning documents of the various areas across campus. (IIID2.10- One Time Funding Allocations).

In addition, at Cypress College, departments and programs undergo regular PR/QR to assess the progress made towards the pursuit of identified goals. The PR/QR includes an assessment of past stated goals and objectives. The assessment process relates past resource allocation in a department or program with progress made. PR must connect department goals and expenses to institutional plans like the EMP and Strategic Plan (IIID2.3 – AC-R PR). Further, programs may request additional resources for special programs or services through the One-time Funding process or Strategic Plan/Institutional Set Standards (SP/ISS) funds. These funding requests must contain links to SP directions as well as expected outcomes (IIID2.11 - One-Time Funding Process).
Template). Assessment data is used to evaluate the results of the programs, for example, the SP/ISS fund requires and Year End report (IIID2.12 - Guardian Scholar Year-end Report).

NOCCCD and Cypress College adhere to the District Policies and Procedures (see Standard IIID1) established by the District to ensure financial stability. The District’s unrestricted general fund reserves are no less than 5% of unrestricted general fund expenditures. Revenues accruing to the District in excess of amounts budgeted are added to the District’s reserve for contingencies. They are available for appropriation only upon a resolution of the Board that sets forth the need according to major budget classifications in accordance with applicable law (IIID2.13 - BP 6250).

The NOCCCD budget model recognizes four “budget centers” for the purpose of budget allocation and expenditure: District Services, Cypress College, Fullerton College, and the School of Continuing Education (SCE) (IIID2.9 - Budget Allocation Handbook 2013). Cypress College receives approximately 32% of State FTES funding allocated to the instructional sites (IIID2.14 - BAM Power Point). For a detailed discussion of FTES funding, see the Proposed Budget (IIID2.15 - NOCCCD Budget 15/16, p. 17-18).

NOCCCD has not experienced cash flow issues despite occasional delayed allocations from the State. Additionally, Cypress College has adequate resources to maintain business transactions without interruption therefore NOCCCD has not needed loans or Certificates of Participation (COPS) (IIID2.16 - evidence?).

Cypress College also has sound financial practices and procedures. The on-going planning works to ensure the long-term financial health and stability of the College. The ending fund balance for Cypress College’s immediate past three years is:

- 2015/16 - $2,334,909 (IIID2.15 - Proposed Budget 16/17, p. 24)
- 2014/15 - $5,833,148 (IIID2.18 - Proposed Budget 15/16, p. 20)
- 2013/14 - $8,504,587 (IIID2.19 proposed Budget 14/15, p. 10)

The campus also sets aside $750,000 each year to address unanticipated emergencies. Thus far, the fund has been adequate for emergency needs (IIID2.17 - Emergencies Spreadsheet). There are also locally generated funds at the College such as: Swap Meet revenue, Food Services revenue, grants, donors and fundraisers that are used to meet the needs of the students. (IIID2.20 – Ext. Day Percentage Spreadsheet)

The District utilizes two shared governance decision-making groups District Consultation Council (DCC) and District Council on Budget and Facilities (CBF) to ensure financial stability and sound financial practice, and communicate financial information in a timely manner. The DCC consists of the Chancellor, Vice-Chancellors, Cypress and Fullerton College Presidents, the Provost from SCE, as well as leaders of constituency groups such as Academic Senate.
Presidents, CSEA and UF Presidents, Student President and Trustee (IIID2.21 - DRM). The members of the CBF are, Vice Chancellor, Finance and Facilities District Director, Fiscal Affairs, VP of Administrative Services – CC and FC, Manager, Administrative Services – SCE, Vice Chancellor, Human Resources, one faculty from each site appointed by the Academic/Faculty Senate – CC, FC, and SCE, two representatives appointed by CSEA, United Faculty Representative, Adjunct Faculty United Representative, District Management Association Representative, Confidential Employees Group Representative, and one student from each site appointed by Associated Students – CC and FC (IIID2.18 - NOCCCD Budget 14/15, p. 40).

These groups work together to ensure the financial health of the District and colleges. Further, members of DCC and CBF are expected to disseminate financial information to relevant parties on their respective campuses. The District also posts its annual Proposed Budget and Financial Report on its NOCCCD website (IIID2.22 - Budget Documents Webpage), which clearly delineates expenditures and connects them to the District Strategic Plan Directions (IIID2.15 - NOCCCD Budget 15/16, p.38 ). Finally, financial information is distributed through many processes, such as the Budget Allocation Model Forums hosted at each campus and the public hearing of the proposed budget at the Board of Trustees meeting (IIID2.14- BAM Powerpoint; IIID2.23 - BOT Minutes, Sept. 2016).

**Analysis and Evaluation**

**The College meets the Standard.** Cypress College’s mission and goals are the foundation for the College’s financial planning. Guided by the College major planning documents, EMP and SP, financial planning is integrated with and supports all institutional planning. As part of the budget allocation process, the College aims to link budget allocations and funding to Program and Quality Reviews and other College planning documents. The College has policies and procedures that ensure sound financial practices and financial stability. Funding requests must be linked to the College’s Strategic Directions and assessments of meeting anticipated goals and outcomes are an intrinsic element of the funding process. Through the District shared governance groups DCC and CBF, the District works to ensure broad participation of all constituency groups in order to ensure sound practices and oversight. In addition, appropriate financial information is disseminated throughout the college by campus representatives on DCC and CBF. The District also posts budget and financial information on the District website.

IIID3. The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

Evidence of Meeting the Standard
Financial planning and budget development begins at the District level according to NOCCCD Board Policies 6200-Budget Preparation and 6250-Budget Management (IIID3.1a- BP 6200; IIID3.1b- BP 6250). A schedule referred to as a Budget Calendar is provided to the Board of Trustees by October 15th of each year. The schedule includes dates for presentation of the tentative budget, required public hearings, Board study sessions, and approval of the final budget. At the public hearings, interested persons may appear and address the Board, regarding the proposed budget or any item in the proposed budget (IIID3.1a – BP 6200).

The District follows a process laid out in the NOCCCD Budget Allocation Handbook (BAH) utilizing the aforementioned timeline in order to allocate funds to each of the budget centers (IIID3.2 – BAH). Constituency groups are represented in both District planning and budgeting groups, District Consultation Council (DCC) and the Council on Budget and Facilities (CBF) as previously described (See Standard IIID2) and have the opportunity to participate directly in the budget planning and development process. In addition to making recommendations related to NOCCCD fiscal resources and facilities, the CBF monitors NOCCCD’s fiscal solvency, reviews and revises budget assumptions, reviews and shares information on the state budget including capital outlay funds and reviews the draft budget in its developmental stages. Members of the CBF include administrative personnel, but most importantly, include full and part-time faculty representation, classified and confidential employee representation, as well as student representation (IIID3.2 – BAH, p. 4). This helps to ensure constituent representation and participation in financial planning and budget development.

Once Cypress College receives those funds, it follows established guidelines and processes to develop its own institutional plans and budget with participation from all constituency groups through the shared governance process. The shared governance process at the campus begins with the Planning and Budget Committee (PBC) which serves as the primary recommending body to the President’s advisory Cabinet (PAC) on general budget and planning issues. The purpose of PBC is to convey to PAC the views of the campus community on matters relevant to both budget and planning for the College. All actions of PBC are then communicated to its constituencies in the form of minutes which include full discussion, including the intent of PBC. Constituency groups include administrators, faculty, classified staff and students (IIIDE3.3 – PBC Guidelines).

PAC serves as the primary recommending body to the College President on the establishment of campus policies and procedures and general college issues within the scope of PAC including its role as final advisory and planning body for the College President. PAC also includes administrators, faculty, classified staff, a Confidential representative and students (IIID3.4 – PAC guidelines). These two shared governance groups work together in the areas of financial planning and budget development on behalf of the College.

Analysis and Evaluation
The College and District meet the Standard. Cypress College and NOCCCD clearly define and follow established Board policies and campus guidelines and processes for financial planning and budget development. As members of the District (DCC and CBF) and College (PBC and PAC) decision-making groups, all constituencies have appropriate opportunities to participate in the development of institutional plans and budgets.

While meeting the Standard, both the College and District would benefit from increased participation in the budget decision-making processes. Constituency groups have representation on the major decision-making groups, however, their “participation” is often informative in nature as opposed to collaborative. In other words, decisions that have been made are presented to members of the committees as a fait accompli, with little opportunity to make changes or participate in the process. Both the District and College would benefit from increased collaboration and solicitation of input from constituency groups as an intrinsic element of the decision-making processes used.

IIID3.4 -- Cypress College President Advisory Cabinet Guidelines

IIID4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Evidence of Meeting This Standard

The NOCCCD and Cypress College engage in on-going planning based on realistic expectations of resources. The District and College routinely monitor state budget developments in anticipation of potential changes. The NOCCCD Budget Allocation Handbook 2013 (BAH) (IIID4.1) contains a timeline and process for budget development which provides an overview of the steps undertaken to assess resource availability and budget development.

In January, the Board of Trustees reviews the Governor’s January Budget and affirms that the District Strategic Directions are the NOCCCD priorities for the coming fiscal year. The District Consultation Council (DCC) reviews the District-wide Strategic Plan and proposed allocations for the District Strategic Plan Fund. Budget Officers draft budget assumptions and forward them
to the Council on Budget & Facilities (CBF). On a monthly cycle, budget assumptions are revised, as needed, based upon new information and updates. During the months of July and August, the Vice Chancellor of Finance & Facilities and District Director of Fiscal Affairs review state budget changes and incorporate those changes into the Proposed Budget assumptions (IIID4.1 - BAH, p. 5).

Consistent with NOCCCD Board Policy 1001-District Mission, Vision & Values Statements (IIID4.2), NOCCCD has established funding priorities in a manner that helps the District achieve its mission and goals. Codified in the 2011 NOCCCD Comprehensive Master Plan (CMP) (IIID4.3), the District Strategic Directions are intended to serve as a guide for the District’s decision-making and use of resources for the next five years. These strategic directions focus on completion, the achievement gap, basic skills, planning and decision-making, and partnerships.

In order to maintain a realistic assessment of financial resources, the District engages in on-going oversight. All funds designated as District Funds (e.g. General Fund, Capital Outlay, Bond, Self-Insurance, Retiree Benefits, Grants, and Financial Aid) are dually maintained within Banner and the Orange County Department of Education (OCDE). Additionally, the Board of Trustees ratifies all contracts, personnel hiring and purchase orders (IIID4.4a- BP 6330; IIID4.4b- BP 6340). Finally, the CCFS-311Q report is submitted to the Board of Trustees, as required, for governing board review on a quarterly basis (IIID4.5.a – BOT Meeting November 2016; IIID4.5b- 311Q Report).

The College receives tentative allocations for the coming fiscal year based on the Budget Allocation Model (BAM) and builds a site-specific tentative budget. In June, the tentative budget is presented to the Board of Trustees for approval. Budget Officers analyze year-end results and incorporate these results into local planning processes. In September, a final budget is presented to the Board of Trustees for approval. Discussions on these various topics are communicated in board meetings and captured in the minutes of various meetings such as the College Planning and Budget Committee (PBC) and President’s Advisory Cabinet (PAC), as well as in District meetings of DCC and the CBF (IIID4.1 – BAH, p. 5).

Cypress College’s institutional planning integrates the realistic expectation of financial resources with the mission and goals of the Strategic Plan. The College has aligned its Strategic Directions A, B and C with the District’s stated directions above and has developed multiple goals to address and achieve various outcomes contained in the stated directions (IIID4.6 - Proposed Budget 15/16, p. 38). Budgeting decisions regarding personnel, operations and critical needs of the College are intrinsically linked to the Strategic Directions. Other funding sources such as One-Time Funding and the Strategic Plan/Institutional Set Standards Fund are also directly linked to planning. Direction committees prioritize the College’s One-time Funding requests as their first priority, thereby aligning those budget allocations with strategic directions as well (IIID4.7- SP). In anticipation of changes to funding, the College maintains healthy carryover funds each year. A significant portion of the College’s carryover funds is used to address
program needs, updating instructional equipment, library collections, technology upgrades and tutors (IIID4.6- Proposed Budget 15/16, p. 56) need to re number when done

Approaches to generate revenue or reduce expenses locally are continually sought out. The College has worked to develop partnerships with local civic and business groups to help generate additional funding and fiscal resources. The College’s Foundation works with organizations such as Forest Lawn, Toyota Corporation, Follett Corporation and Union Bank to acquire additional funds to help meet the instructional needs of students (IIID4.8– evidence?). The College works to develop additional financial resources by partnering with outside vendors. The result of that effort is a Swap Meet which generates $1.7 million per year for discretionary use (IIID4.9-Swap Meet Audit). The Bookstore was also outsourced three years ago and has increased sales by $1 million resulting in commission to the College of nearly $400,000 per year (IIID4.10 Follett Commissions). Additionally, the current contracts for Food Services and vending now generate approximately $175,000 per year (IIID4.11- YBH Commisions). The College also rents its unused instructional spaces to community groups and has leased rooftop space to two cell service providers (IIID4.12– Evidence?).

Analysis and Evaluation

The College and District meet the Standard. Cypress College institutional planning reflects a realistic assessment of financial resource availability. Available resources are reviewed with campus and District committees in an inclusive, fiscally sound process of achieving funding goals with funding priorities centered on student learning. The College’s EMP and SP are used as the guide for resource allocation. The fiscally conservative practices of both the District and the College have insured financial stability even during times of economic downturn. Long-term implications are considered even for shorter term decisions. The District has no Certificates of Participation. The financial position is regularly evaluated and then reported via the CCFS-311Q report.

The College works to develop financial resources and partnerships with outside groups including Forest Lawn, Toyota Corporation, Follett Corporation and Union Bank, and other outside vendors to fulfill expenditure requirements necessary to meet the needs of students.

IIID5. To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision-making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

Evidence of Meeting the Standard

The NOCCCD and Cypress College work to ensure financial integrity in multiple ways. As discussed in the previous standard (see IIID4), the NOCCCD Budget Allocation Handbook 2013 (BAH) outlines a timeline and process for budget development, which provides an overview of the steps undertaken to assess resource availability and budget development. By allocating equitably based on the resources available, the BAH is used as a control method of administering funds (IIID5.1- BAH). In addition Board policies and procedures provide the appropriate control structures and mechanisms to ensure responsibility and integrity.

In the effort to implement effective internal controls, NOCCCD Board Policy BP 6300 – Fiscal Management (IIID5.2), BP 6330 – Purchasing and Warehouse (IIID5.3 ), and BP 6340 – Contract Controls (IIID5.4), address the need to maintain internal controls in the administration of District financial resources and consistent with Title 5 section 58311, Education Code section 84040 (IIID5.2 – BP 6300). These policies encourage departments to develop internal procedures
that delineate the need for separation of duties, regular reconciliation of financial transactions and maintenance of adequate supporting documentation. The District provides control guidelines at various levels, as necessary, to ensure controlled completion of a project (IIID5.5 – Memo on Inventory Count).

In order to be transparent regarding how the allocation of funds are made, the Vice-Chancellor of Finance and Facilities and the District Director of Fiscal Affairs make an annual presentation, on the college campuses, of the Budget Allocation Model (BAM) utilized (IIID5.6- BAM PowerPoint). In addition to this presentation, discussions at weekly Chancellor’s Staff and Council on Budget and Facilities (CBF) meetings allow staff to participate and discuss optimal ways to improve the equitable allocation of resources (IIID5.7 – CBF Minutes? CS Agenda).

To further enhance internal controls, the District employs its own internal auditor who conducts regular internal audits, provides advice to management on financial control issues and, as necessary, functions in a consulting capacity by assisting others in developing control procedures. The internal auditor utilizes a risk-based audit assessment program (IIID5.8 – Risk Based Audit Methodology) to prioritize audits. Every effort is being made to anticipate a control weakness before it becomes a problem.

Annually, the District also engages an external audit firm to conduct a comprehensive audit of its financial statements as required by NOCCCD Board Policy 6400 – Financial Audits (IIID5.9). For 2016/17 the District has engaged the services of Vavrinek, Trine, Day & Company to perform the audit of the annual financial statements. Auditors conduct a thorough audit of all District financial activity, issue an opinion as to the accuracy of the financial statements and offer suggestions or findings on issues which may have been identified. Audited financial statements, compliance reports, and audit findings are promptly disseminated to the respective departments for their review and timely response (IIID5.10a – BO evidence?; IIID5.10b- Karen email). The results are closely monitored for expedient action. After appropriate actions are taken by the College and/or District to ameliorate any issues identified, the result of the audit is presented formally to the Board of Trustees (IIID5.11 – BOT Minutes, December 2016).

The annual financial audit is comprehensive, taking into account transactions at both the District and campuses as well as evaluating student information used for state funding. Any audit findings are directed first, to the College and the appropriate institutional leadership, and a management response is requested within a reasonable time. When appropriate, subsequent collaboration between the College and District Fiscal Affairs on required changes are decided and implemented on a timely basis. In their last audit opinion, the auditors stated:

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities, and the aggregate remaining fund information of the District as of June 30, 2015, and the respective changes in financial position and cash flows thereof for the year then ended in
accordance with accounting principles generally accepted in the United States of America (IIID5.12 – Annual Audit Report).

The annual external audit reports are posted on the District website and submitted annually to ACCJC as required (IIID5.13 - District Audit Webpage.)

In addition to the annual District audits, Cypress College employs campus internal control structures to ensure financial integrity and appropriate financial management practices. The College utilizes three primary control mechanisms, Separation of Duties, Multiple Approvals and Staff Rotation to promote efficacy and integrity of financial practices.

First, the College utilizes a separation of duties structure that works to prevent opportunities for mismanagement or misappropriation. All College financial processes involve multiple employees who have different responsibilities and duties. This organizational structure serves to minimize the opportunity for a single person to complete an entire transaction independently. Further the separation of duties decreases the chance of a single employee committing fraud (IIID5.14 – Evidence?).

Another control mechanism used to ensure fiscal integrity is the multiple approvals necessary to make financial decisions. Major financial expenditures require several layers of approvals before resources can be allocated. Required approvals vary based on the type of request made (IIID5.15 - evidence?). For example, requests made for amounts in excess of $10,000 require additional approvals, those requests made after depletion of initial funding also require separate approvals. All computer related requests are subject to review and approval by campus Academic Computing and District Information Services (IIID5.16 – One-Time Funding Request).

Finally, Cypress College ensures ongoing fiscal integrity through the rotation of staff in key areas. Staff member assignments are rotated on a regular basis in areas such as the vault and bank reconciliations to prevent the opportunity for inappropriate action (IIID5.17- Evidence).

The VP of Administrative Services is responsible for the oversight of all College fiscal affairs and the timely dissemination of dependable information that may impact financial decisions of campus departments. The VP monitors the budgets and expenditures of all departments, which includes the key areas of Maintenance and Operations, Campus Safety, Utilities, Extended Day and more. The VP alerts departments to budget insufficiencies or changes in funding in time for departments to make appropriate adjustments. In addition, the VP monitors the changes in State and District budget assumptions and communicates these to the President’s Advisory Cabinet (PAC) and Planning and Budget Committee (PBC) in order to make informed decisions (IIID5.18 – Evidence).

In addition to the ongoing monitoring discussed above, the College also regularly evaluates financial management practices to identify potential problems or issues, and uses the results of those assessments to improve control systems. For example, in 2014 the College evaluated the
parking permit practices utilized by the Campus Safety Department and concluded that the cash handling process was problematic. In addition, the distribution of parking permits was time-consuming and inefficient. The College researched alternatives and in 2016/17 switched to an online license plate recognition system that eliminated the cash collected at permit kiosks and through registration streamlined the ticketing process to more efficiently use the time of Admissions and Records and safety officers (IIIID.19 - Evidence).

The College also engages in on-going evaluations of key area department budgets to ascertain the efficacy of the financial management practices used. Evaluations are designed to monitor the on-going spending rates of departments to assess whether the spending is efficient. Year End reviews are conducted to evaluate revenue collected, spending patterns and overages to identify problems and improvements to be made (IIIID.20 - Evidence?).

Analysis and Evaluation

The College and District meet the Standard. NOCCCD and Cypress College work to ensure the financial integrity of the District and College. Through District Board policies and procedures as well as College fiscal practices, both institutions engage in responsible use of financial resources. The internal and external annual Districts audits support and monitor internal control structures to confirm that appropriate financial oversight occurs. To augment the annual financial audit, the District Internal Auditor conducts regular audits based on the risk-based Audit Assessment to ensure that day-to-day District operations are performed efficiently. In addition, the College control mechanisms, Separation of Duties, Multiple Approvals and Staff Rotation have been effective in promoting appropriate fiscal management.

The District and College widely disseminate dependable and timely information for sound financial decision-making at Chancellor’s Staff and CBF (District), as well as PAC and PBC (College) meetings, as well as posting audit reports on the District website. The District and College engage in regular evaluation of financial management practices, through the regular review process of Board policies and procedures, response to audit findings and the review of campus practices. The results are used to improve internal control systems where needed.

IID6. Financial documents, including the budget have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

**Evidence of Meeting the Standard**

Cypress College and NOCCCD work to ensure that financial documents are credible and accurately reflect the allocation of resources to support student learning. The Banner Financial Module (Banner) is the primary tool the District and College use to track financial transactions. Through the Banner system, appropriate staff members have access and engage in ongoing oversight of financial documents and transactions including budget allocations, revenues, transfers, payroll postings, budget expenditures, and expenditure transfers (IID6.1-Evidence?).
In this manner, District and College employees work together to maintain the integrity and accuracy of financial records.

As discussed previously (see Standard IIID1), NOCCCD has established multiple Board policies and procedures to govern financial decisions and processes. The District employs numerous financial professionals, including Certified Public Accountants (IIID6.2- CPA Evidence from Pete), who work to ensure fiscal responsibility. These experienced professionals in the District and College Finance Offices constantly review the detailed financial information in Banner and work with all internal and external auditors to rectify any deficiencies that may occur so that information is not only credible and accurate, but reflects appropriate allocations to student learning and program services (IIID6.3- evidence).

The District allocates all available funds and publishes budget documents which are approved by the Board of Trustees. The Tentative budget is approved in June and the Annual Proposed budget is approved in September (IIID6.4a- BOT Minutes June, 2016; IIID6.4b- BOT Minutes Sept 2016). In addition, budget documents are revised as additional funds (grants and categorical programs) are received (IIID6.5-BOT Minutes, Dec. 2016). Every year during the budget development process a Budget to Actual Expense comparison report is prepared, which illustrates the differences between budgeted amounts and actual expenditure by major account code (IIID6.6- Budget evidence). The District presents budget information throughout the budget development process at monthly Council on Budget and Facility (CBF) meetings in which all constituents have representation (IIID6.7 –CBF Summary, May 2014).

Annual audit findings are shared with the CBF and District Consultation Council (DCC), Chancellor’s Staff and the Board of Trustees (IIID6.8a- CBF Minutes; IIID6.8b – DCC Minutes; IIID6.8c - Chancellor’s Staff agenda; IIID6.5- BOT Minutes, Dec.2016). Annual Audits are posted on the District Website as well (IIID6.9- Audit Webpage).

The Council on Budget and Facilities (CBF) was created after the previous accreditation visit. This entity reviews the allocation of funds for budget purposes and reviews how the District divides resources to the various campus sites. Each year the CBF reviews proposed budget assumptions in consideration of known and estimated changes including growth funding, the full-time faculty obligation, and COLA. Later budget assumptions are adjusted after the State budget is finalized each year (IIID6.10 - evidence). After the close of the prior year budget, carryover funds are reconciled and added to the ongoing proposed budget allocation. The NOCCCD budget is finalized in September with the approval of the Board of Trustees (IIID6.4b – BOT Minutes, September 2016). The budget allocations, including carryover funds, are summarized in the Annual Proposed Budget and Financial Report (IIID6.11 - Annual Proposed Budget Report).

Analysis and Evaluation
The College and District meet the Standard. Cypress College and the NOCCCD make certain that financial documents, including the budget and audits have a high degree of credibility and accuracy. This is done through the Banner Finance Module which manages all financial transactions for the College and the District along with oversight by multiple, experienced, financial personnel who monitor Banner on an on-going basis. In addition, internal audits conducted in response to ad hoc issues, in conjunction with regular external audits serve to confirm the accuracy and credibility of financial documents.

While meeting the Standard, the end of the year carryover data is somewhat misleading. College carryover funds are budgeted in the ongoing supplies and/or equipment lines which inflates those budget line items. Early each fall, allocation decisions are made and the carryover funds are redistributed to areas of need. For the last several years, carryover funds have been used primarily to meet FTES targets not met by the Extended Day Funding Model allocation. While the budget accurately represents the carryover funds remaining each year, the placement of those funds in supplies/equipment while allocation decisions are made does not accurately represent monies available for those needs.

IIID7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

Evidence of Meeting This Standard

The District’s and the College’s fiscal management is handled conservatively, transparently, and prudently. The financial audit requirement is mandated by NOCCCD Board Policy BP 6400 – Financial Audits (IIID7.1) in compliance with the requirement under Title 5. Currently, the District has engaged the services of Vavrinek, Trine, Day & Co., LLP, as external auditors (IIID7.2 – 2016 Audit). Their audit scope is comprehensive in accordance with Government Auditing Standards in considering the District’s internal control over financial reporting and compliance. Part of their responsibility is to express opinion on the quality of the financial statements based on reasonable assurance that financial statements are free from material misstatements (IIID7.2- 2016 Audit, p. 2).

At the District level, audit reports and findings are discussed at the Council of Budget and Facilities (CBF) (IIID7.3 – need CBF Minutes audit) and the bi-monthly Budget Officers meeting (IIID7.4- Budget Officers Agenda). At the College, when the external auditors contact District fiscal affairs about tentative findings or if something needs clarification, they are referred to the campus Vice President of Administrative Services who, in turn, speaks with the appropriate departments, divisions and/or offices. Audit Findings are a campus priority and are handled expeditiously and in a timely manner (IIID7.5- email regard audit to Karen evidence?).

The District is committed to transparency in all financial transactions. Audit reports, especially audit findings, are not taken lightly. The Budget Officers keep a close watch on all audit issues and any concerns are directed to the proper channels for early resolution. The Budget Officers committee consists of the Vice-Chancellor, Finance & Facilities, District Director, Fiscal Affairs, District Manager, Fiscal Affairs, Vice-Presidents of Administrative Services at Cypress and Fullerton Colleges, campus Bursars and the Manager, Administrative Services, School of Continuing Education. These are the individuals tasked with the management of financial transactions at the District and the campuses (IIID7.6 – DRM, p.21).

Over the past six years, the District received clean audit reports that had no material weaknesses or significant deficiencies, and no audit adjustment required. There were minor issues that were identified and resolved on a timely basis to the satisfaction of the external auditors. The following are the financial audit results over the past six years.
<table>

</table>
It is the practice of the District Fiscal Affairs to remedy any audit issues, exceptions or management advice on a timely basis. These exceptions are sent out to the respective divisions of the District or campus and are given a specified amount of time to respond.

Cypress College responds to audit findings in a timely manner. In the 2011 annual audit there was one finding for Cypress College regarding Return to Title IV (IID7.7- 2011 Audit). It was noted that in some instances, the College’s portion of the Return to Title IV funds were not returned within the 45 day requirement. While the funds were returned; it was not within the 45 day requirement. Due to staff turnover within the Cypress College Financial Aid office there was a lack of oversight to ensure that transmittal of funds to the Department of Education, occurred within the 45-day requirement. A procedural change was implemented to require a monthly review of calculations and submittals that will prevent this finding from recurring in the future (IID7. 7– 2011 Audit, p. 72).

In the 2015 annual audit there was one finding for Cypress College regarding Residency Determination for one Veteran student who claimed California residency and no documentation was available to prove residency (IID7.11- 2015 Audit, p. 90.). The VACA Act allows for reduced requirements for veterans to receive State residence status effective July 1, 2015. Personnel at the college campuses implemented the VACA Act in Spring 2015, which was prior to the effective date. The CCFS-320 report was corrected to accurately reflect the correct resident FTES (IID7.11- 2015 Audit, p. 91).

Analysis and Evaluation

**The College and District meet the Standard.** NOCCCD and Cypress College respond to external audit findings in a comprehensive and timely way. The audit results and findings are communicated to the appropriate District (DCC and CBF) and College (PAC and PBC) constituency groups in their regular meetings. In addition, the results are emailed to the staff and posted on the District website in a timely manner. In the last six years there have been three audit findings identified for Cypress College and appropriate resolutions have been made. One finding took more than one fiscal year to correct but all corrections are up-to-date.

The financial audit is the vehicle that validates how the District manages its finances in accordance with prescribed accounting methods and government regulations. Continued government funding largely depends on proper management of those funds. It is important to demonstrate the propensity to maintain control of funds that is best reflected in a clean audit report.

Evidence Sources

IID7.1 – NOCCCD Board Policy 6400-Financial Audits
The institution’s financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

Evidence of Meeting the Standard

There are various methods employed by the District and College to validate financial and internal controls. The first of these is the annual financial audit conducted by an outsourced external audit firm as required by NOCCCD Board Policy BP 6400 – Financial Audits (IIID8.1) and presented by the auditors to the Board of Trustees (IIID8.2 – BOT Minutes, Dec. 2016). The focus of the audit is to validate the annual financial statements for accuracy, consistency, effectiveness of the operations and assessment of internal controls and governed by prescribed rules of government auditing standards (IIID8.3 – Auditor Responsibility). Any finding is noted in the audit report and the status verified in the subsequent year (IIID8.4a- Audit Report). The respective budget officer is tasked to ensure that any finding is resolved quickly. The District has had only two audit findings in the past five years; both were immediately resolved (IIID8.4 a-e - Audit Reports).

In addition to the task performed by external auditors, the District Internal Audit Department (reporting to the Vice-Chancellor of Finance & Facilities) conducts regular audits of District and campus departments. Internal Audits goes into operational detail beyond the scope of the annual financial audit and includes an evaluation of the department’s internal controls in an effort to identify potential risk for fraud and recommend remedial solutions, as necessary. These audits are scheduled based on a risk-based audit assessment program to ensure that high-risk areas are quickly audited and problems resolved (IIID8.5 – Risk Assess. Method.). Any findings are
forwarded to the respective departmental head for immediate action. These are followed up by the respective District or campus budget officer to ensure compliance. For example, in 2016 when irregularities in the Admissions and Records office were suspected, the College requested an audit be conducted by the District internal auditor. When the audit findings were submitted to the VP of Administrative Services, appropriate personnel and procedural changes were made to address the findings (IIID8.6a- Audit Report, IIID8.6b- Evidence?).

The next line of controls comes from the users themselves. For example, District Fiscal Affairs monitors the financial systems, daily, to determine that the modules are consistent with one another. Any concern is immediately brought to the attention of District Information Services management for resolution. Other departments conduct ongoing reviews and raise issues for resolution as these are identified. In addition, users attend various conferences and meetings and learn new concepts that may enhance their work or cure deficiencies within their current work process (IIID8.7 – Evidence? Conf Flyer? Email?). These issues are brought to the attention of the departmental manager for evaluation and resolution. As necessary, the respective budget officer may be involved in any control issues.

The fourth area of review requires that all District Departments reporting to the Chancellor conduct an annual Administrative Review of their operations evaluating efficiency and effectiveness of their systems and processes (IIID8.8– Administrative Review). This includes identifying control procedures that describe their business activities and responsibilities of employees within their organization. Recommendations made in the “Improvements” section of the review are evaluated in the subsequent year to determine if remedial recommendations were implemented. This annual review, performed by internal staff familiar with their processes, is designed to flush out deficiencies in operations. Some departments engage outside firms to evaluate controls in addition to extensive review of their systems as in the case of District Information Services (IIID8.9– Ludford email or contract?). The result of these reviews are reviewed by departmental management with their staff and forwarded to the Chancellor for evaluation and action. Financial and internal controls are matters discussed at the bi-monthly Budget Officers meetings (IIID8.10 – Budget Off. Meeting agenda) with the Internal Auditor participating as necessary.

Since the audit is one of the primary evaluations of the District and College internal controls systems, the District engages in a regular comprehensive review of the potential external auditing firms to be considered before awarding contracts. A thorough review of firm and auditor experience, training, and competence is conducted to assess the auditing firm’s effectiveness and validity. In 2016, the District reviewed six competing audit firms before selecting Vavrinek, Trine, Day and Company (IIID8.11 – BOT Minutes, April 2016). Auditing firms are selected based on positive review and the District uses the review process to ensure ongoing improvement of auditing services rendered.
At the College, the effectiveness of internal control systems is a part of the annual Manager Evaluation. Each year, the VP of Administrative Services evaluates the performance of managers in key areas that include financial managers in the Bursar’s Office, the Business Office and more. All managers, including those reporting to the Executive Vice-President and President, identify goals and are evaluated in terms of progress made towards the goals set. Efficiency and validity of their control systems and on-going improvement of those systems as well as staff members supervised are intrinsic elements of the evaluation process. Managers are expected to recognize problem areas and offer solutions to improve services and processes. For example, when Cypress College received abnormally high water bills . . . . . (IID8.12- Cant email Evidence).

Analysis and Evaluation

The College and District meet the Standard. NOCCCD and Cypress College’s financial and internal control systems are evaluated and assessed for validity and effectiveness. Audits, reviews, and written procedures are the tools that ensure continuity and validate the integrity of financial statements as reflected in the audit reports. Internal control systems are reviewed regularly through annual Manager Evaluations and scheduled external audits. The results of the assessments are used for improvement as potential problems are brought to management’s attention as soon as possible. The District emphasizes that internal control deficiencies should be taken seriously and any request for response are given a high priority. Further, the District engages in thorough review and vetting of auditors to ensure the most effective and valid evaluations are conducted.

IID9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.

Evidence of Meeting the Standard

The District maintains sufficient cash reserves to meet all of its financial obligations including emergency needs. The May 10, 2016 Quarterly Investment Report to the Board of Trustees (IID9.1- BOT Minutes May 2016, p. 196) showed a total District deposit with the County Treasury of $223,639,646 almost all of which is available to meet the District’s operational cash requirements. The monthly General Fund payroll for the District averages about $15.8 million (IID9.2-Payroll 2015/16).

The District builds and maintains sufficient balances in various funds to ensure that future cash needs will be met. The District recognizes obligations and liabilities as they are promised or incurred and accounts for them appropriately. As per NOCCCD Board Policy 6250- Budget Management (IID9.3), the District is required to maintain at least a 5% reserve. At the end of Fiscal 2016, the District held approximately $48.4 million in the combined General Fund reserve or about 22.3% of expenditures (IID9.5- 311Q Budget Report). Additionally, the District held about $152.9 million in other funds for retiree health benefits, self-insurance and capital projects (IID9.4–New Pete 311 report pdf)

The District takes a deliberate and methodical approach to ensuring sufficient resources are available to meet operational and emergent needs. Over the past six years, the District’s ending fund balance has averaged $44,395,448 or 27.1% of expenditures (IID9.5- 311Q Budget Report). The following reflect the cash balance at the end of each fiscal year.

</table>

A detailed Proposed Budget / Financial Report (IIID9.6- Proposed Budget) is published each year that specifies not only the allocation of financial resources for spending, but also the designation of other funds to be used in future fiscal periods. The District has sufficient resources to ensure financial solvency because of the controls over spending in relation to resources and the recognition of long-term liabilities.

The most significant long-term liability for the District is the participation in CalPERS and CalSTRS retirement systems. Each year, the District fully funds its liability in each of these systems (IIID9.1 – BOT Minutes, 2016, p. 196-197). In FY2015-2016, the State increased the Base Allocation to Districts with the implicit direction that this increase in funding was intended to cover future PERS and STRS rate increases. A clear indication of the District’s commitment to future financial stability is the designation of all of the recent Base Augmentation funding for STRS and PERS rate increases over the next several years (IIID9.7- CalPERS/STRS Multi-Year). By designating the entire augmentation, the District should have sufficient resources to cover the anticipated increases through FY2025.

While the District has been setting funds aside for more than a decade for retiree health benefits and has accumulated over $70 million in this fund, in FY2015-2016, the District set up a GASB-compliant OPEB irrevocable trust to fund retiree health benefits and established a Retirement Board of Authority to oversee the investments in the trust (IIID9.8 – BOT Agenda Item Feb. 23, 2016). An MOU was negotiated in June 2016 with the labor groups to move the $70 million in retiree health benefits into the irrevocable trust (IIID9.9 – MOU Irrevocable Trust). While this transfer of funds into the irrevocable trust should greatly reduce the annual required contribution in the future, the District has been meeting the Annual Required Contribution (ARC) for the past few years (IIID9.10 – Annual Audit, p. 48).

The District recognizes obligations as they are developed. For instance, the District utilizes the position control module in Banner to accurately reflect the cost of salaries and benefits which make up the vast majority of the operational expenditures (IIID9.11 – Banner Position Control Report). Multi-year labor agreements also help stabilize operational cash requirements and lead to greater fiscal stability.

The District through its Risk Management Division ensures that there is adequate insurance coverage for property, liability, Cyber, student Insurance and workers compensation. The
District has added two additional policies through the School’s Excess Liability Fund (SELF) that provides up to $55 million for liability coverage (IIID9.12 – ASCIP Declarations). Risk Management actively transfers risk to contracting parties whenever possible, participates in insurance service consortiums, conducts safety trainings and provides safety inspections all designed to provide integrity and ensure financial stability of the organization.

Cypress College maintains a budgeted Campus Contingency Fund of $750,000 which is used to address unanticipated emergencies or time sensitive opportunities which do not have another source of funding. The Campus Contingency Fund is established each year from carryover funds (IIID9.13 -Evidence).

Analysis and Evaluation

The College and District meet the standard. NOCCCD has sufficient cash flow to maintain stable operations of the District and College. In addition the District and College maintain support strategies in the form of reserves for appropriate risk management and contingency plans to meet financial emergencies and unforeseen occurrences. The District also ensures that adequate insurance coverage for property, liability, Cyber, student Insurance and workers compensation is in place.

The District has engaged in fiscally conservative practices to ensure long term financial stability. Even during the recent State budget crisis when significant amounts of cash for budget allocation were being deferred to future years, NOCCCD did not have to borrow funds to maintain cash flow.

IIIID10. The institution practices effective **oversight of finances**, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

**Evidence of Meeting the Standard**

The NOCCCD Fiscal Affairs Division is tasked with overseeing, controlling, and reconciling the finances of the District as mandated by *NOCCCD Board Policy and Administrative Procedure 6300- Fiscal Management* (IIIID10.1a- BP 6300; IIIID10.1b- AP 6300). While there is an array of finances flowing into the District, the vast majority of funding is received from the State of California under the “apportionment” process where funds are received based on the Full Time Equivalent Students (FTES) calculation (IIIID10.2-FTES Apportionment). This process is carefully monitored, justified to the State and subject to eventual audit. Funds are transmitted by the State to the Orange County Department of Education Treasurer’s Office where District funds are maintained. The fund account is charged when checks are issued to settle District financial obligations (IIIID10.3-Check Issue Process).

Justification for the propriety of allocating District financial resources are determined by management oversight that includes review by the Council on Budget and Facilities (CBF), District Consultation Council (DCC) and the Budget Officers. Scrutiny includes verification of financial resources based on the Budget Allocation Handbook (BAH). In these meetings, financial utilization is discussed to validate the effectiveness of expenditures (IIIID10.4- Evidence? minutes). The CBF makes recommendations regarding policies, planning and the allocation of resources. The CBF reviews and revises the annual budget assumptions, and serves as a forum for discussions on fiscal issues (IIIID10.5- DRM, p. 16). This process is followed by justification of expenditures to the Board of Trustees with special focus on how the resources are adequately used to maximize its use to benefit students (IIIID10.6 – BOT minutes Evidence?). District Fiscal Services is tasked with reconciliation of expenditures against the budget and grant requirements.
Recently the District hired its first full-time Internal Auditor who has developed a risk based audit plan (III.D10.7- Risk Based Methd.) to assist administration in oversight of critical areas of operation in the District. In addition to the internal audit function, an annual external audit is performed which includes review of financial aid, grants, and the foundation (III.D10.8- 2016 Audit).

At the College, effective oversight of finances relies on procedures such as monitoring of major budgets for projected deficits, monthly reviews of auxiliary financial statements and of financial updates for grants budgets, internal auditing throughout the year, and the District annual external audit. There is a consistent layering of review and approval levels between the College and District. Purchase requisitions route electronically from the originator through appropriate management channels reaching the District Director of Purchasing for final approval. Routing does not proceed without the review and electronic signature of staff at specific checkpoints (III.D10.9 – Sample approval queue?). Any reallocations between major expenditures are approved by the Board (III.D10.10- BOT Evidence?). Financial information is easily accessible with the College’s Banner enterprise business system so that individuals are able to monitor their own budget unit’s allocations and financial transactions (III.D10.11-evidence? Sample screen?).

Financial Aid is made available to defray a portion of the cost of student’s education (e.g. Pell grants). Applications for financial aid are handled by each campus. The reconciliation of student financial aid is conducted by District Fiscal Affairs after receiving information processed by the campus. Subsequently, funds are requested from the Department of Education and paid to an outside company “Higher One” tasked with disbursing the funds to students (III.D10.12 evidence?). Title IV programs are Federal Student Aid and Student Loan programs authorized under the Higher Education Act of 1965. These are controlled by the campus Financial Aid Offices (FAO) that have procedures consistent with Federal regulations (III.D10.13- FAO Policies and Procedures).

NOCCCD Board Policy and Administrative Procedures 3280 - Grants describes how grants are processed (III.D10.14a BP 3280; III.D10.14b- AP 3280). Program-based grants come from various sources, mostly government, for the purpose of enhancing school operations, research and instructional activities. Applications for grants are normally initiated from the campuses and upon approval, expenses incurred are verified by District Fiscal Affairs and reported monthly or quarterly in accordance with the directive of the grant (III.D10.15a- HS Monthly report; III.D10.15b–Second Quarter report). All expenditures for grants are properly documented for future audit (III.D10.16-evidence?).

At the campus level, grants are managed by the Grant Administrator and/or designee. The designee is normally the person(s) appointed as a professional expert or faculty on reassigned time to manage the daily outcomes of the grant. All expenses are represented by a Banner requisition and purchase order, following approvals that originate at the division/department
level and proceed up the ladder, including the Executive Vice President (EVP), Vice President (VP), President, district purchasing and others, before the expenditure is made (IIID10.17a-Board Agenda item, November 2016; IIID10.17b- Budget detail; IIID10.17c- Budget Resolution November 2016).

For grants, the campus Grants Administrator reviews and approves individual hiring and purchase requests for compliance with the applicable grant workplan, before the requisition is advanced for further approvals (IIID10.18-Email Approval). Expenditures are approved per NOCCCD Board Policy and Administrative Procedure 6150- Designation of Authorized Signatures, which identifies positions at the District and the College authorized to approve certain transactions, and the limits of that authority for those same positions (IIID10.19a BP 6150; IIID10.19b-AP 6150).

Each grant is subject to the oversight and management of the grantor agency (State of California, California Community College Chancellor’s Office-CCCCO, U.S. Department of Energy, U.S. Department of Labor, National Science Foundation, etc.). In each case, an individual at the grantor agency is designated to monitor the College's/District's expenditures, progress on the workplan, and accountability. These monitors work closely with the campus Grant Administrator, grant coordinators and District personnel to assist in answering questions, approving changes to the budgets and/or workplans, and in reviewing and approving reports submitted in compliance with the grant agreement (IIID10.20-Donley email).

All the grants are audited annually by an independent auditor appointed by the district as mandated by Title 5. Further, the individual grants undergo specific audits by the granting agency; usually on an annual basis (IIID10.21- CTEF Audit Report). Education Department General Administrative Regulations (EDGAR), Title 5, California Education Code and other legislative mandates apply in this process. Finally, many of the grants are audited continuously by the grantor agency, as the monthly, quarterly, and annual reports are received by them. To date, there have been no "negative findings" for the grants at the College (IIID10.15a-HS Monthly report; IIID10.15b –Second Quarter report).

Per NOCCCD BP/AP 6150, current contracts up to $5,000 may be approved by the VP of Administrative Services or the President (IIID10.19a BP 6150; IIID10.19b-AP 6150). The VP of Administrative Services is responsible for certain contractual relationships such as: Bookstore Operations, Swap Meet Operations, Facility Rental Agreements, Bond Program Service Contracts (architects, construction contractor), and Food Services Operations. Monthly financial statements, as appropriate, are provided by the contracted party when payments to the College are due. Contract language is drafted with the intent to develop fair contracts that would allow each party to function at the highest level, while always taking into consideration the regulations and policies that govern the College. "Out" clauses are included in every contract for any breach, for cause, and for no cause (IIID10.22-Evidence?).
Effective management of the larger contractual relationships requires regular face-to-face meetings with representatives of the contracted party to review and evaluate the services being provided. When the contract requires payment be made to the service provider, invoices for service are carefully reviewed and discussed to confirm payment is only made when service has been delivered per the contract (IIID10.23- Cant email).

In addition, approved contracts which involve significant payments be made to the College are also subject to an independent audit review as a term of the agreement with the College (Swap Meet-Open Air Market/Newport Diversified, Bookstore-Follett Corporation, Food Services- YBH Restaurants). Other contract relationships are specific to divisions and departments on campus and require the managers in those areas provide the appropriate oversight to the contract relationship and service (independent contractors, clinical agreements, etc.) (IIID10.23- Cant email).

Per BP/AP 6300, the Bursar maintains accounts for student and department activities (IIID1.a - BP 6300; IIID1.b- AP 6300). All programs accounts are regularly monitored for financial viability. The regular assessment of various budgets can result in adjustments in budgeted revenue or expenditure, or meetings with administrators responsible for those budgets (IIID10.24- evidence?).

Campus auxiliary organizations such as Associated Students, which includes several clubs, and the Cypress College Foundation, maintain their funds with the campus Bursar’s Office. Most of these are generated from fund raising events and governed by Fundraising Guidelines established by the College (IIID10.25). The Cypress College Foundation is a (501c3) non-profit organization. The Foundation is a separate legal entity with its own tax ID number and, as such, has a separately performed annual audit. The Cypress College Foundation has a financial advisor to assist in managing the endowment investment portfolio. The Foundation Board has established its own conservative investment guidelines with an emphasis on protecting the principle of the endowment fund. The investment portfolio is reviewed monthly by the Foundation Finance Committee and is also subject to an annual external audit (IIID10.26-Foundation Audit).

Cypress College Bursar’s Office is overseen by a professional financial administrator. The Bursar’s Office is responsible for auxiliary fund record keeping and student registration fee reconciliation. In this role the Bursar’s Office performs billing, fee collection, vendor payment processing, reimbursements to campus personnel, scholarship processing, registration fee refunds, third party registration payments, journal entry posts, department/division fundraising activity deposit processing, 1098T and 1099 processing, and auxiliary funds (not required for the campus’ immediate needs) investment (IIID10.27- evidence?).

The Bursar makes investments with excess cash with the understanding that the primary objective of campus investments is to preserve and protect investment principal and therefore
complies with *NOCCCD Board Policy 6320- Investments* (IIID10. 28). As a result, the College focuses on negotiable certificates of deposit (CDs) so if needed, they can be liquidated with minimal or no penalty. Besides comparing interest rates, the Bursar ensures that the prospective financial institution is a member of the Federal Deposit Insurance Corporation (FDIC), or a credit union whose deposits are insured by the National Credit Union Administration (NCUA) (IIID10.29- Do email).

**Analysis and Evaluation**

**The College and District meet the standard.** NOCCCD and Cypress College practice effective oversight of finances in several ways. All District and College financial management is subject to internal and external audits to ensure fiscal accuracy and responsibility. Further, the College engages in on-going oversight of other financial aspects as well. The Financial Aid Office has established appropriate oversight policies and procedures that are consistent with state and federal regulations. Similarly, grants and other externally funded programs utilize appropriate controls and are compliant with associated government and organizational regulations. The College and District maintain contractual agreements and manage investments consistent with established *NOCCCD Board Policies and Administrative Procedures BP/AP 6300, BP 6150 and BP 6320*. The Bursar’s Office oversees the auxiliary organizations such as Associated Students and Clubs as well as expenses of the Cypress College Foundation to ensure appropriate management of their resources. Finally, the Cypress College Foundation utilizes the oversight of its own Board and an annual audit to maintain their fiscal health.

IIID11. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

Evidence of Meeting the Standard

The District meticulously ensures that sufficient financial resources are available to meet operational needs at all times. The District maintains sufficient balances in various funds for future institutional needs and sets aside a reserve of 5% from the unrestricted general fund in accordance with NOCCCD Board Policy 6250 - Budget Management (IIID11.1). Funding is provided for educational improvement, innovation or related priorities.

The District is committed to future financial solvency. After receiving an increase in state funding for PERS/STRS future increases the District set aside these funds to meet those obligations. The District designated the base augmentation funding for STRS and PERS rate increases over the next several years (IIID11.2 – Multi-Year Fiscal Projections).

It has also addressed Other Post-Employment Benefits (OPEB) through an irrevocable trust (IIID11.3 – BOT Resolution). An MOU was recently negotiated with the labor groups to move $70 million in retiree health benefits into the irrevocable trust and a Retirement Board to oversee investment in the trust was assembled (IIID9.4 – MOU Irrevocable Trust). An actuarial firm is engaged to analyze the retiree health benefits and determine the annual required contribution (ARC) and outstanding liability (IIID11.5 – Actuarial Reports Webpage).

The District’s commitment to meet long-term financial needs is further illustrated through the commitment to long term facilities planning. The District has adopted a five-year construction plan to ensure planned expenditure of Bond funds (Measure X and J Bonds) maximizes instructional facilities (IIID11.6 - Five-year Construction Plan)

Further evidence of its commitment to meeting long-term obligations includes instructional salaries that the District negotiates with labor representatives and structuring multi-year labor agreements (IIID11.7a – AdFAC Contract, III11.7b- CSEA Contract; IIID11.7c – UF Contract). The labor salary funding helps stabilize cash requirements for future periods. It is also committed to providing adequate insurance coverage, accruing vacation time, and load banking for instructional staff, close scrutiny of future contractual commitments and completion of scheduled maintenance for forthcoming periods (IIID11.8 – Scheduled Maintenance Proposal).

All long-term financial obligations are included in the annual budgeting process. The annual Proposed Budget/Financial Report is prepared and published describing how financial resources
are to be spent during the fiscal year and future fiscal periods (IIID11.9 – Proposed Budget 16/17). The District undergoes a series of program reviews that prioritize operational needs, allocates funds and subsequently monitors their use. The budget expenditures are discussed in committees such as the Council on Budget and Facilities (CBF) composed of District and campus officials (IIID11.11- CBF Summary, May 2014) and eventually reported to the Board of Trustees quarterly (IIID11.12- BOT Minutes). Financial performance is also audited by an outside auditing firm annually and validated through internal audits conducted by the District Internal Auditor.

Analysis and Evaluation

The District meets the standard. NOCCCD controls financial resources and ensures that sufficient financial resources are always available to meet current and futures obligations and emergency needs. Board Policy 6250 as well as long term employee retirement planning, work together to maintain the financial resources necessary to provide for both short-term and long-term financial solvency of the District. The irrevocable trust established to anticipate long-range financial obligations enables the District to engage in short-range financial planning with the knowledge that those priorities will be met. Through this long term planning as well as on-going assessments, NOCCCD identifies, plans, and allocates resources for payment of liabilities and future obligations.

Evidence Sources

IIID11.7a – Adjunct Faculty United Contract 2013-17
IIID11.7b – California School Employees Association Contract 2015-18
IIID11.7c – United Faculty Contract 2013-16
IIID11.8 – Scheduled Maintenance Proposal
IIID11.9 – Proposed Budget/Financial Report 2016-17
IID12. The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post Employment Benefits (OPEB), compensated absences, and other employee-related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

Evidence of Meeting the Standard

NOCCCD builds and maintains sufficient balances in various funds to ensure that future institutional needs will be met. Additionally, the District recognizes obligations and liabilities as they are committed or incurred and accounts for them appropriately. While the District has NOCCCD Board Policy 6250- Budget Management (IID12.1) to maintain at least a 5% reserve, at the end of Fiscal 2015, the District held approximately $47.1 million in the combined General Fund or about 23.6% of expenditures. Of the $47.1 million identified $15.9 million can be attributed to sites’ carryover funds. The $15,940,860 was derived from site specific revenue, or budget conservation during prior years. It has been the practice for many years to use these funds as backfill for budget reductions, purchase instructional equipment, help pay for tutorial services, computer replacement plans, address facility repairs, and professional development. Cypress College’s share of the carryover was $5,833,148. (Evidence Proposed Budget & Financial Report 2015-2016, p. 18 and p. 56).

Additionally, the District held about $152.9 million in other funds for retiree health benefits, self-insurance and capital projects (IID1.17a–Summary Retiree; IID1.17b–NOCCCD Balance Sheet). need to update source too)

The District recognizes obligations as they develop. For instance, the District utilizes the position control module in Banner to accurately reflect the cost of salaries and benefits which make up the vast majority of the operational expenditures. As salaries are increased through the collective bargaining agreements, budgets are increased using the position control module. Each year, compensated absence liabilities are calculated and reflected in the Audited Financial Report (IID12.3- Compensated Absences).

The most significant long-term liability for the District is the participation in CalPERS and CalSTRS retirement systems. In FY2015-2016, the State increased the Base Allocation to Districts with the implicit direction that this increase in funding was intended to cover future
PERS and STRS rate increases. A clear indication of the District’s commitment to future financial stability is the designation of all of the recent Base Augmentation funding for STRS and PERS rate increases over the next several years. By designating the entire augmentation, the District should have sufficient resources to cover the anticipated increases through FY2025. Each year, the District fully funds its liability in each of these systems (IIID12.4 – Proposed Budget 15/16 p. 18-19).

For many years the District has promised employees with 15 year of service, fully funded retiree health benefits that are similar to current employees. The District engages an actuarial firm every two years to analyze the retiree health benefits and determine the annual required contribution (ARC) and the outstanding liability (IIID12.5 – Actuarial Report). The last actuarial study was prepared in 2014 and is posted on the District’s website (IIID12.1- Retiree Benefit webpage.). An update is planned for the 2016 year.

While the District has been setting funds aside for more than a decade for retiree health benefits and has accumulated over $70 million in this fund, in FY2015-2016, the District set up a GASB-compliant OPEB irrevocable trust to fund retiree health benefits and established a Retirement Board of Authority to oversee the investments in the trust (IIID12.6 – Retirement Board Bylaws). An MOU was negotiated in June 2016 with the labor groups to move the $70 million in retiree health benefits into the irrevocable trust (IIID12.7- MOU). While this transfer of funds into the irrevocable trust should greatly reduce the annual required contribution in the future, the District has been meeting the ARC for the past few years (IIID12.2- Final Audit Report, p. 46)

Analysis and Evaluation

The District meets the standard. NOCCCD plans for and allocates appropriate resources for future obligations, including STRS/PERS obligations and retiree health benefits. The District has ensured long term obligations are met through the established irrevocable trust. The actuarial plan is current, prepared as required by appropriate accounting standards, and available on the District website.

IIID12.4 –Proposed Budget and Financial Report 2016-17

IIID12.5 – Retiree Benefit Actuarial Report
IID13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

Evidence of Meeting the Standard
NOCCCD and Cypress College do not currently have any locally incurred debt.

Analysis and Evaluation
The Standard is not applicable. Since NOCCCD and Cypress College do not have locally incurred debt, the standard does not apply.

IID14. All financial resources, including short and long-term debt instruments (such as bonds, and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

Evidence of Meeting the Standard
NOCCCD ensures that loans, bond revenue, categorical program funding, auxiliary operations revenue, donations and grants are utilized in accordance with applicable restrictions and guidelines through various control and monitoring processes. Each year the District undergoes an extensive set of compliance and financial audits (IID14.1- Audits webpage) which verify the use of restricted funds and then reports the result of those audits to the Board of Trustees (IID14.2 – BOT December, 2016). These audits are also available on the District’s web site (IID14.1-Audit Website).

The largest single source of restricted funding is the issuance of long-term general obligation bonds to be repaid by District property owners. These funds are intended to be used to renovate existing facilities and build new facilities. The District passed Measure X in 2002 for $239 million (IID14.3 –Measure X Bond Webpage) and Measure J for $574 million in 2014 (IID14.4- Measure J Bond Webpage), both of which continue to fund facilities modernization projects. A Citizens Oversight Committee (IID14.5a- Measure X Oversight webpage; IID14.5b- Measure J Oversight Webpage) reviews the expenditures relating to Measure X and Measure J bonds, a control measure that ensures that District spending is consistent with the
purpose and goals of the bond measures and spending is subject to annual performance and financial audit (IIID14.6- Measure X Audit; IIID14.7- Measure J Audit).

Auxiliary spending activities at the campus are closely monitored by the Bursar’s office (IIID14.8 – Campus Bursar Guidelines). These include Associated Students Accounts, departmental fundraising efforts, etc. that are also monitored through Fund Raising Guidelines (IIID14.9 –Fundraising Guidelines) developed for this purpose. The Bursar and Fund Raising guidelines define the steps that need to be taken to manage fund raising events and justify subsequent expenditures that are subject to similar approval processes as other expenditures (IIID14.9 Fundraising Guidelines). The College’s Associated Students (AS) is funded by an optional $7 per semester student services fee that supports student clubs and co-curricular activities. The AS budget and end of year financial reports are prepared by the VP of Fiscal Affairs in cooperation with the other AS officers with oversight from the Advisor to the AS Council (IIID14.10- AS Bylaws).

The Cypress College Foundation raises funds for student scholarships, student emergency assistance, faculty/staff mini-grants, endowments, and other College programs. The Foundation accepts donations on behalf of the College from businesses and individuals. The funds raised are used for a variety of purposes consistent with the Mission of the Foundation including scholarships and min-grants (IIID14.11- Foundation Webpage). The Foundation is subject to an annual audit to ensure that funds are used appropriately and with integrity (IIID14.12- Foundation Audit).

Grants fall in two categories, student financial grants and operational grants. Student grants such as Pell and others are controlled by the campus financial aid officers. Student’s eligibility for Pell grant is driven by three factors: 1) the Expected Family Contribution on the FAFSA 2) the cost of attendance 3) enrollment status. The Financial Aid Office uses the Pell chart from the Department of Education to determine the student’s eligibility. Other Grants are determined based on the student’s remaining financial need and enrollment status (IIID14.13 – Pham email). The financial information is reviewed by District Accounting and subsequently arranges for disbursement to students through an outside firm “Higher One.” In 2016, the District processed a total of $57,612,244 in financial aid. Of this amount, $43,830,556 was from federal Pell Grants and $3,565,211 from Cal Grants (IIID14.14- Banner Financial Report).

Operational grants are funds received by the District to enhance academic development as required by NOCCCD Board Policy 3280 – Grants (IIID14.15) and spending is monitored by the originating department and expenses reviewed and reconciled by District Accounting. The office of the Vice-Chancellor of Education and Technology makes every effort to coordinate all grant activities and chairs the District Grants and Resource Committee (IIID14.16 – District Grant and Resources Committee). District Accounting reconciles all grant expenditures. At the end of FY 2015, there were 40 outstanding operational grants totaling $5,711,255 (IIID14.17 Evidence).
Analysis and Evaluation

The College and District meet the Standard. All financial resources obtained by NOCCCD and Cypress College are used with integrity and in a manner consistent with the intended purpose. Both the District and College have processes in place to ensure monies obtained are utilized in the manner expected by those issuing the funds. The Citizen’s Oversight Committee has ensured that Bond Measures X and J have been used responsibly to renovate existing facilities and build new facilities. District and Campus policies and procedures ensure that auxiliary activities such as Associated Students and other campus clubs engage in fiscally responsible spending and fund-raising efforts and use their funds for student learning experiences. NOCCCD BP 3280 governs the responsible use of grants. All financial resources are used with integrity and consistent with the mission and goals of the College.

IID14.17 – awaiting grants evidence

IID15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

Evidence of Meeting the Standard

All student funding including student loans, application for federal grants (e.g. Pell Grants), Veterans Educational subsidy, student auxiliary funds, etc. are handled by Cypress College departments. The campus Financial Aid Office (FAO) handles all financial aid and student loans packaged through the Federal Direct Loan Program (IID15.1a- Fed. Direct Loan Program; IID15.1b- FAO PPM). At the end of Fiscal Year 2016, Cypress College administered a total of $18,362,144 in Pell grants and $1,648,317 in loans (IID15.2- Pell Grant and Loan Distributions).

The FAO is responsible for implementing controls to minimize financial aid fraud and therefore monitors student loan default rates. Published 3-year student loan default rates are as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Default Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>2010</td>
<td>12.8%</td>
</tr>
<tr>
<td>2011</td>
<td>20.3%</td>
</tr>
<tr>
<td>2012</td>
<td>18.4%</td>
</tr>
<tr>
<td>2013</td>
<td>17.5%</td>
</tr>
</tbody>
</table>

(The IID15.3- School Default Rates).

An institution with a 3-year default rate of 30% or more for any year must establish a default prevention taskforce to develop and implement a default prevention plan to reduce the rate. This default prevention plan must be submitted and approved by the Department of Education (IID15.4 – Regulation 34 CFR Part 668 Subpart N). Cypress College’s default rate is currently well below that threshold – 2013 Cohort Rate at 17.5%. Since the current default rate is below this threshold, Cypress College is not required to have a default prevention plan in place. However, in an effort to engage in continuous improvement, the FAO has developed a Default Prevention Plan to further reduce the rate (IID15.5- FAO Default Prevention Plan).

According to the Default Prevention Plan, Cypress College provides pre-borrowing workshops which inform students about regulations to educate anyone applying for loans. In addition,
Cypress College has a contract with Education Credit Management Corporation (ECMC), a third party vendor, to assist with default management. ECMC tracks and contacts students who are delinquent or at risk of default (IID15.5 – Default Prevention Plan).

The Director of Financial Aid, in collaboration with the Loan Coordinators, established a loan Policy and Procedures Manual (PPM) to ensure that the College is in compliance with federal regulations (IID15.1b-FAO Policies and Procedures, p. 40-44). Per the FAO PPM, when loan requests are approved based on maintaining Satisfactory Academic Progress (SAP) and meeting the Cypress College’s loan policy requirements, the Financial Aid Office submits the data to the Department of Education (DOE) for approval (IID15.1b – FAO PPM, p. 14-22 and 40-44). Loans are then disbursed two times per year, 30 days after census, in the Fall and Spring semesters; if a student is receiving a Fall-only or Spring-only loan, the disbursement will come as two separate disbursements within the semester (IID15.1b - FAO PPM, p. 40-44). If students are not eligible, loans will not be originated and no disbursements will be issued.

As discussed previously, in 2010 and 2011 the College’s Return of Title IV funds were not returned within the 45 day requirement. Once notified, the Financial Aid Office promptly returned the funds and examined the deficiency in the return procedure. A procedural change was implemented to require a monthly review of calculations and submittals that will prevent this problem from recurring in the future (IID 15.1b - FAO PPM, p. 68).

Veterans subsidy (paid directly to the educational institution) is another government funding controlled by the college through an assigned Veterans Coordinator. Chapter 33 education benefits also known as the Post 911, is provided to veterans with active service of at least 90 days after September 10, 2001 for a 40% of total education aid and up to 100% if active service totals three years. Chapter 31 subsidy is for veterans with disability (Vocational Rehabilitation) for pre-employment classes (IID15.6- Evidence?).

The Cypress College Veterans Office administers this funding which includes verifying veterans educational funding application, working with the Veterans Administration (VA) to fund classes based on established criteria and perform reconciliations to determine overfunding to be returned to the VA (IID15.7- VAO Reconciliation Procedure).

Currently, there are no assets recorded for student revenue streams.

**Analysis and Evaluation**

**The College and District meet the Standard.** Cypress College and NOCCCD work together to ensure that both are in compliance with all regulations. The District coordinates all fiscal audits except for audits conducted by state and federal agencies for College-specific grants and contracts. Audits, including the independent audit of the College’s finances, rarely identify a
finding. When a finding is identified it is immediately resolved. The College works in conjunction with the District Office to guarantee compliance on all levels of financial aid administration, both federal and state and regularly monitors student loan default rates. Though not required, the Financial Aid Office has established a default prevention plan and engaged ECMC, a third-party agency to assist with default management. The Veteran’s Office works to ensure appropriate oversight of veterans’ subsidies as well.

IIID16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provision to maintain the integrity of the institution and the quality of its programs, services, and operations.

Evidence of Meeting This Standard

NOCCCD contractual practice is authorized by NOCCCD Board Policy BP 6340 – Bids and Contracts (IIID16.1), Board Policy 6600 - Capital Construction (IIID16.2) Board Policy 6330 – Purchasing (IIID16.3) and Board Policy 6150- Designation of Authorized Signatures (IIID16.4). The contractual practices are consistent with Education Code Section 81641, 81820, Public Contracts Code 53060, and Title 5 Section 57150.

In order to maintain the quality of NOCCCD programs and services, the two main considerations when entering into a contract are minimizing risks and obtaining the best value, which at times, is a challenge. Minimizing risks begins with ensuring contracts (other than ongoing purchase orders for goods and services) undergo legal and indemnity review. The District engages a legal
firm, as necessary, to provide contractual review and contract development (IIID16.5 - Contract processing Guidelines). For indemnity, the District Director of Risk Management, is tasked with conducting the necessary reviews (IIID16.6- Risk Mgt. Webpage).

District Purchasing is thorough in obtaining the best value for the District with their efforts in researching market alternatives and validating sole source availability. They are the best resource due to their numerous contacts. While obtaining the best value is paramount, they are also committed to timeliness of providing the goods and services required for projects. To this end, District Purchasing adopted the State sponsored vendor qualification entitled California Uniform Construction Cost Accounting Act (CUPCCAA) program (IIID16.7). This program increases the limits before competitive bidding is required and submission to the Board of Trustees approval. This pre-qualifies contractors that can be engaged quicker resulting in earlier completion of projects.

There are numerous contracts that are currently active including those for professional services—such as Architects and Cafeteria Food Management. In addition, the District maintains contracts with Independent Contractors for whom the Internal Revenue Service (IRS) requires closer scrutiny through the use of a questionnaire (IIID16.8 – IC Questionnaire) to determine if the contractor, based on the proposed employment meets IRS definitions. As is with other contracts, close scrutiny for potential risk to the District is performed. The critical step is the contract content review process. Presently, the District is engaged with numerous contracts. To expedite processing, contracts are sorted into categories per NOCCCD Contract Processing Guidelines (IIID16.9). This process identifies various departmental personnel best suited to conduct meaningful reviews consistent with the mission and goals of the District. It also allows the contract to be completed on a timely basis. The categories include the following:

- Professional Services
- Clinical Affiliations
- Independent Contractors
- Insurance
- Service/Maintenance
- Environmental, Health & Safety
- Public Works
- Grants
- Systems Technology
- Education
- Facilities

District/College contracts include a certain component of control. This includes the right to terminate a contract due to non-compliance of the party of the second part. Terms of the contract that are closely reviewed include provisions that address default and termination, dispute resolution, payment terms, length of the contract including start and end dates, information for all parties and that terms and conditions meet purchasing guidelines (IIID16.10 -evidence?).
Inherent in contracts with external parties includes compliance with federal, state and local government guidelines. The District/College is mindful that any violation of the required provisions may create unnecessary liability or possibly jeopardize government funding.

Cypress College maintains multiple contractual agreements. Contracts include those for operation of the Bookstore, operation of a weekend swap meet, rental of college facilities, all services related to bond construction programs (architects, inspectors, utility mapping, etc.), consultant services, and clinical contracts with hospitals for Health Services programs. No contract is entered into unless it supports the institutional goals (I16.11- evidence?). Most are routine and standard contracts, which were developed by NOCCCD legal counsel. Others are individually prepared by legal counsel to fit a specific situation (e.g. Bookstore operations.). The College utilizes the District Contract Processing Guidelines to assist those responsible for processing a contract (I16.9- Guidelines).

Unauthorized approval of contracts can result in disciplinary action (I16.12 -Evidence?). Contracts are tools to settle disputes, and to measure performance of contractors. Termination clauses are required by NOCCCD/Cypress College in all contracts (I16.13 - evidence?).

After a contract has been signed, appropriate level (campus, district) personnel will monitor the contract. During the contractual relationship, if there are any concerns, appropriate action is taken to correct and resolve them in a timely manner. After all effort has been made and the problem still exists, either an amendment will be made or the contract will be terminated depending on its scope and the seriousness of the issue (I16.14– evidence).

**Analysis and Evaluation**

In accordance with established NOCCCD Board Policies, contractual agreements with external entities including professional services, independent contractors, Bookstore and Swap meet operations, and other vendors are consistent with the mission and goals of the District and Cypress College. Further, the District Contract Processing Guidelines have established institutional policies and procedures that contain appropriate provisions to maintain the integrity of the District and College. These provisions work to minimize risks, obtain the best value and maintain the component of control including the right to termination if necessary, as appropriate legal counsel and final approval by the Board is sought when required by established dollar limits.

The District Purchasing Department abides by the standards required under CFR 200.318 - General Procurement Standards. It has its own detailed procurement procedures, follows the conflict of Interest guidelines, practices competitive bidding choosing the best value at the lowest cost whenever possible.
