Subject: Re: Accreditation

Hi Debra

I am not sure what you are needing from me. It sounds like Program SLO's?? We also have evaluation tools for our students in clinical training that have to be completed to reach competency. We have SLO's for courses. We have Employer surveys, Pass rates, graduate surveys. We do have Advisory members that we report to for ultrasound and radiology. We have state and national accreditation standards for both radiology and ultrasound. jrcert.org for radiology and jrcdms.org for ultrasound. I will be happy to help with whatever you need. I'm just not sure exactly what that is. We have so many tools and evaluations and surveys for both programs. Let me know.

Thanks
Lynn

Dear Health Science Coordinators:

I am chair of the accreditation committee on instructional programs. I am gathering data to confirm Standard IIA Task 2b of the accreditation report, "The institution relies on faculty expertise and the assistance of advisory committees when appropriate to identify competency levels and measurable student outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution regularly assesses student progress towards achieving those outcomes."

I hope to be able to complete my rough draft by March 3rd but the person who was to have done Task 2b couldn't continue his participation.

Would you be kind enough to educate me on what college and state evaluation and certification tools are currently in existence within your aspect of Health Sciences? Is anything new since 2005? Anything you could provide by email, including online links, or by campus mail would be much appreciated.

Thank you so much for your help.
