Project Cypress College

Project No. 75-15607-00

Subject Cypress College Community Forum Notes

Notes Cypress College Community Forum Meeting:

- Building efficiency was discussed as an important element in the planning and design implementation process.
- Building analysis should include a life cycle focus for determining project scope.
- Approximately 30,000 sq. ft. of space is currently vacant and offline within the existing buildings on the campus.
- Planning efforts should require a review of cumulative used/unused space.
- Further discussion focused on the emphasis of better planning than in the past. Program will strive for better communication and prudent use of funds through strategic sequencing and project prioritization.
